

7 August 2019

Dear Parents/Caregivers,

This correspondence concerns the graphics calculator needs for students studying Mathematics at Sacred Heart College Marcellin Campus in 2020 and beyond.

At Sacred Heart College, we have incorporated graphics calculators into the Mathematics curriculum in accordance with the SACE guidelines. All students studying Mathematics are asked to purchase a CASIO FX – CG50AU colour GC graphics calculator.

The only exception will be those students studying support Mathematics.

The earlier modes Casio fx–9860G-AU PLUS and Casio fx 9850 G AU are still acceptable if you have one.

I would advise that you only purchase one of the CASIO models mentioned above, otherwise it can be difficult to provide the appropriate support for your son or daughter in the use of the graphics calculator.

Attached is an Order Form with **Carron Calculators** should you wish to purchase your Graphics Calculator from them. We would ask that you please place your order promptly and that you send your order to the **Carron Calculators** address, not Sacred Heart College.

Should you have any questions regarding to the graphics calculators please do not hesitate to contact the College on 08 8350 2500.

Mr. Damien Henry  
**Head of Learning Area - Mathematics**
